

Crypto I Hedge Fund

FUND MANDATE

The goal of Panxora Crypto I is to outperform a buy and hold cryptocurrency strategy. The Fund is unleveraged, generating excess returns by only taking long positions in up to 20 of the most liquid cryptocurrencies. The trading approach is 100% systematic. Discretion is only applied to the selection of cryptocurrencies included in the trading programme based on liquidity statistics and market capitalization. The fund achieves a return delta of 40% during crypto up markets and only 27% during down markets. This 13% differential is the key factor that delivers a significantly better Sharpe Ratio compared to a buy and hold strategy.

Hedge Fund Performance (from Launch)			
Month	Monthly Return	Total Return	AUM (,000)
Launch			\$500
March 2020	-0.4%	-0.4%	\$498
