

Setting up basket trading

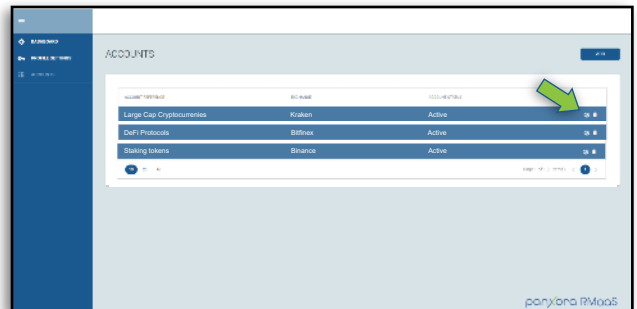

1 <https://rmaas.panxora.io/login>

Log into your RMaaS Dashboard.

2 Select the exchange account to edit

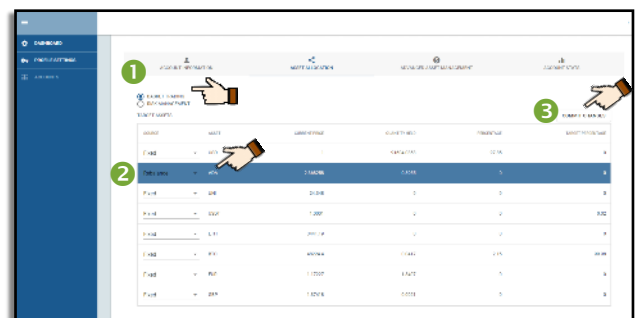

From the left hand menu select Accounts. Select the exchange you want to work with by tapping the  icon for that exchange account.

3 Select assets for Basket Trading

- 1 Basket trading is automatically selected at startup.
- 2 Select **Rebalance** from the dropdown menu for all the assets you want to include in the basket.
- 3 Tap **COMMIT CHANGES** to confirm your selection.

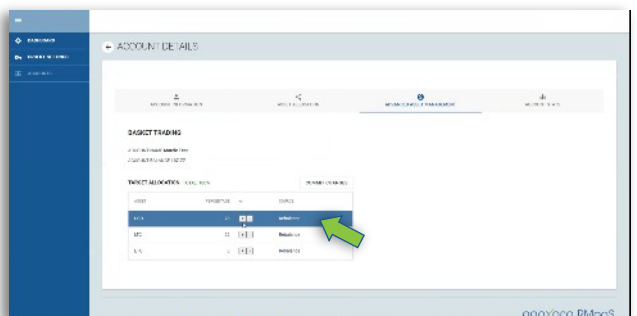

Note: Both digital assets and fiat can be included in the basket.

4 Set target basket allocations

Tap the Advanced Asset Allocation tab. Adjust the relative percentages for each asset to be included in the basket by using the  keys. When the target Account Balance of 100% is reached tap **COMMIT CHANGES** to confirm your selection.

Note: Both digital assets and fiat can be included in the basket.

5 Exchange Account Dashboard

Returning to the dashboard, the positions will be displayed as the system 'basket trades' the account to achieve the relative levels set in the ACCOUNTS area.
