

Setting up RMaaS Risk Management as a service

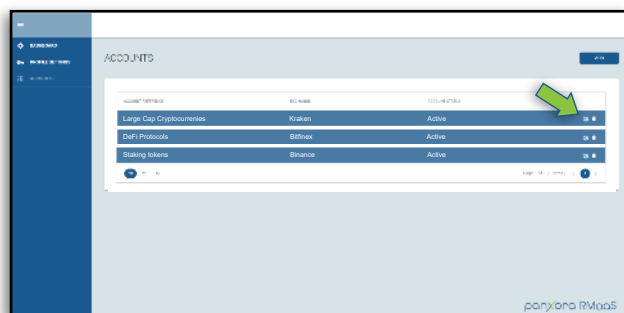

1 <https://rmaas.panxora.io/login>

Log into your RMaaS Dashboard.

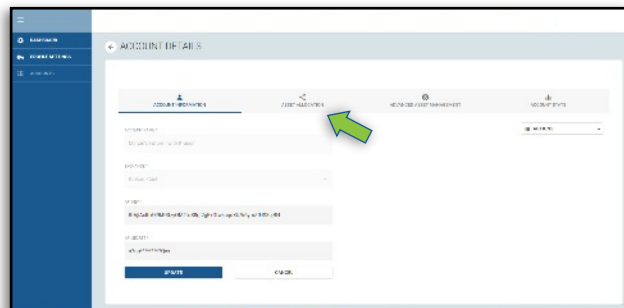

2 Set up each exchange account

From the left hand menu select Accounts. Select the exchange you want to work with by tapping the  icon for that exchange account.

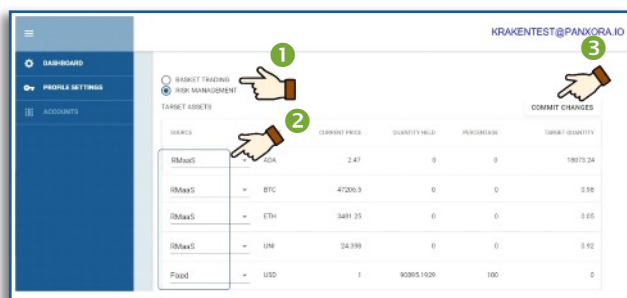

3 Select the Asset Allocation tab

Tapping the Asset Allocation tab will pull in the list of assets available on that exchange. The assets held in your account will appear at the top of the list.

4 Setup Risk Management

- 1 Tap the Risk Management radio button.
- 2 Select RMaaS from the dropdown menu for all digital assets you want risk managed.
- 3 Tap **COMMIT CHANGES** to confirm your selection.
Note: Fiat currencies can only be set to 'Fixed.'

5 Exchange Account Dashboard

The current positions for this exchange will display along with performance statistics. Five days of data will be required before an accurate Sharpe and Sortino ratio Can be displayed.
